Office Action Summary	10/726,740	CARVELL ET AL.		
	Examiner	Art Unit		
	Charles I. Boyer	1751		
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).				
Status		· · · · ·		
1)⊠ Responsive to communication(s) filed on <u>03 De</u>	ecember 2003.			
	action is non-final.			
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is				
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.				
Disposition of Claims				
4)⊠ Claim(s) <u>1-35</u> is/are pending in the application.				
4a) Of the above claim(s) is/are withdrawn from consideration.				
5) Claim(s) is/are allowed.		•		
6)⊠ Claim(s) <u>1-35</u> is/are rejected.				
7) Claim(s) is/are objected to.				
Application Papers				
9) The specification is objected to by the Examiner		•		
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).				
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).				
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.				
Priority under 35 U.S.C. § 119				
		(4) (5)		
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received.				
2. Certified copies of the priority documents have been received in Application No				
3. Copies of the certified copies of the priority documents have been received in this National Stage				
application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a silicone modified polysaccharide, does not reasonably provide enablement for any polymer deposition aid. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 35 provides for the use of a laundry treatment composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 35 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products*, *Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Application/Control Number: 10/726,740

Art Unit: 1751

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-35 are provisionally rejected under the judicially created doctrine of double patenting over claims 1 and 3-37 of copending Application No. 10/726,823. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: The present application claims a silicone, perfume, and deposition aid. The copending application claims a silicone, a viscosity modifying agent which may be a perfume, and the identical deposition aid.

Application/Control Number: 10/726,740 Page 4

Art Unit: 1751

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark et al, WO 00/18861.

Clark et al teach a treatment method for fabrics utilizing a deposition aid having a polysaccharide polymeric backbone and a benefit agent moiety attached thereto. The benefit agent moiety undergoes a chemical change such that the affinity of the material onto the fabric is increased (see abstract). Suitable benefit agent moieties of the invention include silicones (page 14, lines 24-25). Additional preferred components of these fabric care compositions include fabric softeners, such as silicones, as well as perfumes (page 15, lines 4-10). An example of such a composition is an aqueous laundry detergent comprising a nonionic surfactant, a deposition aid polymer, and the balance water (page 45, example 7).

Application/Control Number: 10/726,740

Art Unit: 1751

The reference does not specifically teach the combination of a deposition polymer, silicone, and a perfume. As all of these components however, are either essential or preferred in the laundry treatment compositions of the invention, it would have been obvious to one of ordinary skill in the art to combine these components with a reasonable expectation of successfully obtaining a fabric treatment composition.

9. Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunter et al, US 6,939,842.

Hunter et al teach a laundry treatment composition comprising a silicone and a substituted polysaccharide (see abstract). An example of such a composition is an emulsion comprising nonionic surfactant, polydimethylsiloxane, and silicone substituted polysaccharide (col. 27, example 1). Another example is an emulsion comprising nonionic surfactant, aminosilicone, and silicone substituted polysaccharide (col. 27, example 1). Note that the silicones of the invention comprise polydialkyl siloxanes, amino siloxanes, and mixtures thereof (col. 34, claim 10).

Hunter et al do not specifically teach a perfume, nor do they teach the combination of a deposition polymer, silicone, and a perfume. As perfumes are ubiquitous in laundry detergents for providing a pleasing fragrance, the examiner maintains that one of ordinary skill in the art would provide a perfume in the final form of the laundry treatment compositions of the invention and so render obvious the presently claimed composition.
